

THE JOURNAL OF HORTICULTURAL SCIENCE, VOL. 54, 1979

SUBJECT INDEX

- Absciscic acid, chrysanthemum cuttings, root development, 171
- Akenhead, David, obituary notice, 93
- Apple, calcium extraction, bitter pit, 327
 - clonal variation, 57
 - cultivars, Cox's Orange Pippin, 1, 47, 155, 229, 299, 327, 333
 - Golden Delicious, 155, 217, 229
 - James Grieve, 155
 - Malling Kent, 155
 - Merton Worcester, 91, 181
 - Miller's Seedling, 67
 - Sunset, 181
 - Suntan, 155
 - Reine des Reinettes, 67
 - defoliation, nursery stock, 229
 - diseases, *Nectria galligena*, 47
 - disorders, bitter pit, calcium, 91, 327
 - replant disease, 333
 - storage, 299
 - establishment, unrooted stool shoots, 79
 - flowering, growth regulators, 217
 - fruit, ^{45}Ca distribution, 181
 - composition, calcium, 91
 - production, growth regulators, 217
 - set, pollen application, 67
 - fruiting, growth regulators, 217
 - irrigation, water stress, 1
 - lecithin application, storage disorders, 299
 - mineral nutrition, root temperature, 313
 - storage disorders, 299
 - misting, water stress, 1
 - nursery management, defoliation, 229
 - nutrition, ^{45}Ca , fruit, 181
 - pollen application, mechanical, 67
 - pollen dispensers, evaluation, 75
 - progeny marker, 75
 - propagation, rapid rootstock rooting, 309
 - scions, *in vitro*, 155
 - stool shoots, 79
 - pruning wounds, infection, 47
 - replant disease, formalin treatment, 333
 - soil treatments, 333
 - root temperature, mineral nutrition, 313
 - rootstocks, Crab C, 57
 - M.9, 309
 - M.27, 79
 - rooting *in vitro*, 309
 - scions, propagation *in vitro*, 155
 - soil treatments, replant disease, 333
 - storage, disorders, 299
 - temperature, roots, mineral nutrition, 313
 - water stress, control, 1

Bacterial canker, *see Pseudomonas morsprunorum*

Bean (*Phaseolus*), plant density: crop yield relation, 305

Biochemical changes, forced tulip, 103

- Biological control, *Nectria galligena*, apple, 47
 Britain, spinach, virus diseases, 289
- Cabbage, insecticide residues, removal, 243
 trimming, washing, insecticide residues, 243
 washing, trimming, insecticide residues, 243
- Calabrese, seedling emergence, 199
- Calcium, apple, disorders, bitter pit, 91, 327
- ⁴⁵Ca distribution, apple fruit, 181
- Capsicum annuum*, seedlessness, 159
- Carbohydrate, nitrogen composition, topping, grape, 121
- Carnation, cropping, planting date, stopping, 235
 ethylene, flower development, 225
 growth, petal, style, 225
 nutrition, production, quality, 149
 planting date, cropping effect, 235
 production, quality, B, N, lime, 149
 quality, production, B, N, lime, 149
 solar radiation, cropping effect, 235
 stopping, cropping effect, 235
- Carrot, seedling emergence, 199
- Chemotaxonomy, *Pistacia* spp., 95
- Cherry, fruit set, growth regulators, 27
 pests, *Rhagoletis cerasi*, 167
 pollination, 87
 rootstock, propagation, *in vitro*, 63
 resistance, *Pseudomonas morsprunorum*, 189
- Chilling and heat requirement, pear, 115
- Chrysanthemum, cuttings, root development, 171
 cuttings, root development, abscisic acid, 171
 root development, water stress, 171
 flower bud formation, ethephon, 337
 propagation, cuttings, 171
- Cinchona ledgeriana*, *in vitro* culture, 111
- Clones, variation, apple, 57
- Coffee, irrigation, plant density, 13
 plant density, irrigation, 13
 water relations, Kenya, 13
- Culture *in vitro*, *Cinchona ledgeriana*, 111
- Daphne* spp., diseases, virus, control, 323
 virus control, meristem excision, 323
 thermotherapy, 323
- Diseases, virus, *Daphne* spp., 323
 virus, gooseberry vein banding, 23
- Eggplant, *see Solanum melongena*
- Gamma irradiation, control, *Rhagoletis cerasi*, 167
- Geranium, flowering, light effect, 195
 light requirement, flowering, 195
- Gooseberry, virus disease, vein banding, 23
- Grape, bud activity, topping, 121
 growth regulator activity, topping, 121
 nitrogen, carbohydrates, topping, 121
 topping, bud activity, 121
- Growth regulators, adventitious roots, *Rubus*, *Fragaria*, 273
 apple, defoliation, 229
 flowering, fruiting, 217
 stool shoot establishment, 79
 carnation, flower development, 225
 cherry, fruit set, 27
 chrysanthemum, flower bud formation, 337
 compounds, ABA, 171
 cytokinins, 121
 daminozide, 217
 DPU, 27
 ethephon, 337

- ethylene, 225
- gibberellins, 27, 209, 217
- IBA, 79, 273
- NAA, 27, 273
- NOXA, 27
- phloroglucinol, 273
- 2,4,5-TP, 27
- defoliation, apple, 229
- endogenous, mango, 209
- flower bud formation, chrysanthemum, 337
- flower development, carnation, 225
- flowering, fruiting, apple, 217
- fruit set, sweet cherry, 27
- grape, topping effect, 121
- inhibiting activity, grape, 121
- mango, endogenous, 209
- Rubus*, *Fragaria*, adventitious roots, 273
- Fragaria*, synergism, 273
- stool shoots, apple, 79
- water stress reduction, 171
- Heat requirement, post-dormancy, pear, 115
- Insecticides, diazinon, residues, cabbage, 243
- quinalphos, residues, cabbage, 243
- Irrigation, coffee, Kenya, 13
- water stress, apple, 1
- Kenya, coffee, water relations, 13
- Light, source, quality, geranium flowering, 195
- Mango, cultivar, Sensation, 283
 - disorder, jelly-seed, 283
 - fruit maturation, disorder, 283
 - gibberellin content, 209
 - physiology, fruit ripening disorder, 283
- Misting, water stress, apple, 1
- Morphological changes, forced tulip, 103
- Mushroom, composts, microflora, 137
- Nectria galligena*, biological control, 47
- Nigeria, crops, *Psophocarpus tetragonolobus*, 129
- Nitrogen, carbohydrate composition, topping, grape, 21
- Obituary notice, D. Akenhead, 93
- Sir Edward Salisbury, 165
- Peach, cuttings, planting-out, 33
 - growth from cuttings, 33
 - propagation, cuttings, 33
 - rootstock, *P. persica*, 279
- Pear, chilling and heat requirements, selection, 115
 - cultivars, Barnet, 115
 - Beurré Rance, 115
 - Doyenné d'Été, 115
 - Fleurissant Tard, 115
 - Frangipane, 115
 - Magness, 115
 - Moonglow, 115
 - Packham's Triumph, 115
 - Red Pear, 115
 - Roem van Wijngaarden, 115
 - selection, chilling and heat requirements, 115
- Photoperiodism, tulip growth, 39
- Pistacia lentiscus*, taxonomy, 95
- P. terebinthus*, taxonomy, 95

- P. vera*, chemotaxonomy, 95
 - pollen enzymes, taxonomy, 95
 - taxonomy, pollen enzymes, 95
- Pistacia* spp., chemotaxonomy, 95
 - pollen enzymes, taxonomy, 95
- Plant density, crop yield relations, french bean, 305
 - coffee, Kenya, 13
- Plum, cultivar, Victoria, 279
 - rootstocks, Pixy, 279
 - propagation, *in vitro*, 63
 - resistance, *Pseudomonas morsprunorum*, 189
 - rootstock/scion combinations, 279
- Pollen, dispensers, evaluation, apple, 75
 - enzymes, taxonomy, *Pistacia* spp., 95
 - mechanical application, apple, 67
- Pollination, sweet cherry, 87
- Propagation, cuttings, chrysanthemum, 171
 - cuttings, peach, 33
 - establishment, apple stool shoots, 79
 - rooting *in vitro*, apple rootstock, 309
 - in vitro*, apple scions, 155
 - cherry, plum, 63
 - culture, *Cinchona ledgeriana*, 111
 - micrograft *in vitro*, *Prunus*, 279
 - rootstocks, disease resistance, 189
- Prunus*, propagation, *in vitro*, 279
- P. persica*, rootstock, 279
- Pseudomonas morsprunorum*, on *Prunus*, 189
- Psophocarpus tetragonolobus*, growing, Nigeria, 129
- Pyrus betulaeifolia*, chilling and heat requirements, 115
- P. calleryana*, chilling and heat requirements, 115
- P. serrulata*, chilling and heat requirements, 115

- Raspberry, cane position, cultivars, fruiting laterals, 257
 - cultivars, fruiting laterals, cane position, 257
 - Lloyd George, 267
 - diseases, virus, interaction, 267
 - fruiting laterals, cultivars, cane position, 257
 - growth, yield, virus diseases, 267
- Red currant, virus diseases, gooseberry vein banding, 23
- Rhagoletis cerasi*, control, cherry, 167
 - control, irradiation, 167
- Rubus* hybrid, adventitious roots, growth regulators, 273
 - growth regulators, root formation, 273

- Salisbury, Sir Edward, obituary notice, 165
- Seedlessness, *Capsicum annuum*, 159
- Selection and breeding, pear, chilling and heat requirements, 115
- Soil, seedling emergence, carrot, calabrese, 199
- Solanum incanum*, compatibility, *S. melongena*, 163
- S. melongena*, compatibility, wild spp., 163
- Solanum* spp., wild, compatibility, 163
- Spinach, Britain, virus diseases, 289
 - diseases, virus, Britain, 289
- Strawberry, adventitious roots, growth regulators, 273
 - growth regulators, root formation, 273

- Taxonomy, pollen enzymes, *Pistacia* spp., 95
- Tissue culture, cherry, plum, 63
- Tomato, disorders, leaf distortion, 247
 - disorders, silvering, 247
- Tulip, forced, biochemistry, temperature, year, 103
 - forced, morphology, temperature, year, 103
 - forcing, photoperiodism, 39
 - growth, photoperiodism, 39
 - temperature, year, biochemical and morphological changes, 103

- Virus diseases, gooseberry vein banding, 23
 - heat therapy, meristem excision, *Daphne* spp., 323
- Water relations, coffee, Kenya, 13
- Water stress, chrysanthemum cuttings, root development, 171
- Winged bean, *see Psophocarpus tetragonolobus*
- Wounding, apple stool shoot establishment, 79
- Yield: plant density relations, french bean, 305
